More About Projects (This is a link)

HARD SKILLS

- Web Design
- Back End Coding
- Project Management
- Industrial Robot Programming
- Electrical Engineering

SOFT SKILLS

- Critical Thinking
- Open-Minded
- Out-of-the-Box Thinking
- Problem-Solving
- Communicative

EXPERTISE

- RobotStudio - Intermediate
- C/C++ - Proficient
- Matlab - Proficient
- Python - Intermediate
- HTML / CSS / JS - Beginner
- Shell/Bash - Beginner

HOBBIES

- Reverse Engineering
- Teaching
- Running
- Immersive Sim Games

LANGUAGES

English - Advanced
German - Beginner
Romanian - Native

SOLTUZ-MOCANU IONUT

SYSTEM ENGINEERING PROGRAMMER

I am an eager to learn student, ready to face any challenge. My friends would recommend me for my strong creative and analytical skills. I am meticulous and I thrive in a collaborative environment.

PERSONAL PROJECTS

- TmodLauncher Modding Using C# and Sprites Made in Gimp
- Autoclicker Made in C#
- Impossible to Close Aplication Made in C#
- DIY Drone Using Arduino and Spare Parts(Three-Phase Motors, RC Car Acumulator Battery, 3D-Printed Frame Personally Designed etc.)
- Third Person Shooter Game Using Unity
- C Program that Decrypts a Chinese Text File Into Grayscale Values in PGM Format, Then Applies a Median Filter to Enhance the Image Clarity
- A robotic-arm handling line simulation programmed in an industrial language that automatically sorts objects of varying shapes, positions, and orientations while ensuring product quality.

EDUCATION

UNIVERISTY PROJECTS 2022 - Present

Polytechnica University of Bucharest - Sistems Engineering

- Highly Efficient Anomaly Detection Algorithm in Object Classification
- SQL Database with C# UI
- Web Aplication - Web page made using HTML CSS and JS

MORE ABOUT IN MY GITHUB LINK

PRE-UNIV PROJECTS 2018 - 2022

Nicolae Balcescu National College - Matematica-Informatica

- Robotics Courses
- Informatics, Physics and Mathematics Olympiads
- Programming Summer Camp
- Arduino mini-Rover
